A care manager provides an assessment of client needs and coordination of services. A geriatric care manager helps navigate the care and resources in areas of housing options, in-home services, home safety evaluation, emotional aspects of aging, and unique problems facing the elderly, individuals with disabilities and their families.

A care manager can offer counseling and consultation services, such as grief and loss issues and conflict concerning care issues.

GeriatricCare Management offers a Friendly Visitor Program where care managers will visit a client in their home or in a care facility. The Friendly Visitor can also run errands, go shopping, take the client on outings (lunch, church or a concert).
