Vision Impairment Resources and Technology

Virginia Department for the Blind and Vision Impaired (DBVI)

The Department for the Blind and Vision Impaired (DBVI) is committed to providing quality services to assist Virginia's citizens who are blind, deafblind or vision impaired in achieving their desired level of employment, education, and personal independence. The department provides an array of specialized services to blind Virginians of all ages to assist them in attaining the skills, confidence and positive outlook that are critical to independence.

Virginia Assistive Technology System (VATS)

VATS defines assistive technology as “divided into two categories: devices and services.

Assistive technology devices are any item, piece of equipment, or product system that may be used by a person with a disability to perform specific tasks, improve functional capabilities, and become more independent. It can help redefine what is possible for people with a wide range of cognitive, physical, or sensory disabilities.

Assistive technology services are any service that directly assists an individual with a disability in the selection, acquisition, or use of assistive technology devices that result in greater independence, safety of comfort of an individual.”
