Orthopedic Physical Therapy provides physical therapy. Each therapist utilizes advanced training in manual techniques and exercise.

Treatment of musculoskeletal and joint problems is offered, including chronic pain conditions, fibromyalgia, temporomandibular (TMJ) dysfunction, headaches, pelvic pain, urinary incontinence, interstitial cystitis, and urinary and bowel incontinence.

Osteoporosis Prevention - The program focuses on the prevention of osteoporosis, treatment, and management. The goals are to give an assessment of risk of falls, to provide patient education, and to provide individualized exercise program instruction. Four visits are required. Mary Ann Weber is the contact for this program.

Service Area(s)
