Riverside Shore Cardiopulmonary Wellness Services offers cardiac and pulmonary rehabilitation including comprehensive fitness assessments, health education seminars, and nutritional assessments. Patients with diagnosis of heart attack, open-heart surgery, chronic heart failure, balloon angioplasty can benefit from cardiac rehabilitation which is the use of exercise, education and psychological and emotional support to facilitate a patient's recovery from heart disease.

Pulmonary rehabilitation is the use of monitored exercises, pulmonary specific exercise with respiratory therapists and education to improve on patient's quality of life. Patients with chronic obstructive pulmonary disease, asthma, chronic bronchitis and emphysema can benefit from this type of rehabilitation.

The Wellness programs include fitness assessments, health education seminars, corporate fitness, sports specific training and medical fitness training.
