The Cancer Center at Sentara Northern Virginia Medical Center offers a full range of diagnostic and treatment options for patients with cancer, as well as a number of programs to help prevent and manage this disease. Provides four main treatment options -surgery, chemotherapy, and state-of-the-art radiation treatment and interventional radiology.

Sentara Northern Virginia Medical Center is the first in the area to offer the Xofig Radiation Therapy System to treat breast cancer.

Support services are available, educational programs, support groups, and American Cancer Society programs and free screenings. Visit the website for more details.

You can sign up for an e newsletter, ExploreHealth with Sentara. [Click Here to Sign up](#) for free monthly email newsletter offering advanced notice of screenings and events, information on Sentara services, special offers and more.
