Tidewater Eye Center is a Center for ocular care and vision treatment provides a variety of surgeries and disease treatments. Services include wavefront LASIK eye surgery, glaucoma treatment, and cataract operations.

We offer BOTOX injections at our convenient Virginia Beach and Portsmouth locations as a way to rectify these signs of time and age. BOTOX is a natural, purified protein injected into the targeted area to smooth away lines and wrinkles.

At Tidewater Eye Centers, your surgeon will meet with you in person to perform a FREE in-depth consultation. At this time, we will assess whether or not you are a LASIK candidate and help you determine which Laser Vision Correction procedure is right for you. Your surgeon's personal individualized care will continue after your surgery throughout your post-operative care.

Cosmetic surgery, including eyelid operations, are available.
