Caroline Chiropractic service is a gentle, drugless, non-surgical method of removing interference in your nervous system that may be hampering the body's healing abilities. Spinal nerves between each vertebra of your spine carry the communication to your brain. If the nerve is being interfered with by a bone that is out of place, we call this a subluxation.

A chiropractor can correct the body's misalignment by using hands to apply gentle pressure to the spine. This is a spinal adjustment. Symptoms such as sinus problems, asthma, digestive problems, ear infections, sleeping problems, headaches, neck and back pain, numbness and tingling, sciatica pain could be helped by relieving nerve stress. Nutritional and diet review, testing for sensory impairment and immobility and evaluation of falls are all services that are available. 30% of this practice is devoted to persons age 60 and over.

Service Area(s)

Caroline County
