Languages Spoken

English

Chiropractor services to include spinal assessment/subluxation, upper cervical specific and gentle tonal adjustments. Other services provided geriatric assessment, neurologic function, testing for sensory impairment, immobility, elderly abuse and evaluation of falls.

The latest developments in technology are available to detect problems in the nervous system. Problems may be subtle so that the patient may not be aware but there is still interference between the brain and the body. The interferences are known as subluxations.

A women's morning program is offered twice a month on Tuesday mornings. Call for information.

Service Area(s)
