Warren Memorial Hospital's Cardio and Pulmonary Rehabilitation is a medically supervised exercise and education program designed to optimize the physical, psychological, and social function of individuals who have heart and/or lung problems.

People of all ages who have a heart condition or lung disease can benefit from cardio and pulmonary rehab programs.

Cardiac rehab offered for:

- heart attack
- bypass surgery/valve repair or replacement
- coronary artery stenting
- heart transplant
- stable angina (chest pain)
- heart failure

Pulmonary rehab offered for:

- COPD
- asthma
- interstitial lung disease
- lung transplant
- sarcoidosis

Service Area(s)
