The benefits of chiropractic services are reducing pain and inflammation, improving flexibility, having relief from muscle spasms, improving posture, enhancing body function and overall health, and restoring balance and wellness.

Services offered include geriatric, ADL, IADL, and functional assessments, physical exam, nutritional and diet review, evaluation of falls, testing for sensory impairment and immobility. Other services provided are neurological and orthopedic examinations.

Corrective chiropractic care corrects neck and upper spinal misalignments that cause headaches and sinusitis or shoulder, arm and hand pain and numbness, poor circulation, swelling in limbs, irregularity, indigestion, and creaky knees.

Treatment for neck problems, whiplash, headaches, and spinal check-up for sports are all part of the services available.

Chiropractic Family Health Centre is a Palmercare clinic.
