Audiology/Hearing Aids: Evaluations are performed to identify hearing disorders and recommend non-medical treatment. Hearing aids are dispensed, with a written contract, based on audiological information in accordance with state law. Analog, programmable, and digital instruments are available from various manufacturers. Trial periods and manufacturer warranties are honored. Extended warranties/insurance, ear molds, repair, batteries, other hearing aid accessories, and assistive listening devices are also available.

Hearing evaluation, speech-language evaluation, and speech-language therapy fees may be reduced on a sliding-scale basis by application for residents of Prince William County who demonstrate financial need. Hearing aids may be available through special programs for those who qualify.
