Virginia Medical Group (VMG) provides diagnostic procedures of the heart. These procedures are provided to your physician to evaluate and diagnose the medical condition of your heart. After your tests are interpreted by one of our Board Certified Cardiologists, you will receive the results from the physician who actually ordered the test.

- Cardiovascular tests done in the office include EKG/ECG, Stress Tests, Nuclear Stress Tests, Echocardiograms, Holter Monitors, Event Recordings and Pacemaker and Defibrillator Interrogations.
- Peripheral Vascular tests done in the office include Carotid Duplex Ultrasound, Upper and Lower extremities Arterial and Venous Duplex Ultrasound, Post Exercise ABI Evaluation and ABI, PVR, Segmental Pressure, Doppler Wave Form Studies of upper and lower extremities.

- Cardiovascular tests done in the hospital include Cardiac Catheterization, Coronary Stent Implantation & Balloon Angioplasties, Permanent Pacemaker Implantation and Implantable Loop Recorders.

VMG is affiliated with the following hospitals: SRMC Southside Regional Medical Center, HCA Chippenham Hospital, VCU Medical Center and HealthSouth Rehabilitation Hospital of Petersburg.
