The Jackson Clinics, Alexandria, offers evaluation and treatment, manual therapy, exercise and patient education provided for work or sports related injury. Treatment also for the following conditions: low back pain, neck pain, shoulder injuries, foot and ankle dysfunction, knee instability, post surgical rehabilitation, degenerative disc conditions, arthritis, osteoporosis, finger/hand injuries and gait related issues.

An individualized plan of care based on patient's goals and needs will be developed. Subsequent treatment is provided in one on one session with a physical therapist.

Physical therapists also seek to keep people well and safe from injury by teaching the importance of fitness and showing people how to avoid hurting their bodies at work or at play. An individualized conditioning program can be developed.

Service Area(s)
