Cardiovascular rehabilitation provides individualized exercise and education programs for individuals with problems such as coronary heart disease, heart attack,

bypass surgery, angina and the like. Staff can help each patient restore and maintain his or her best possible physical, mental, social and occupational well-being.

Pulmonary rehab also offers individualized exercise and education plans for individuals with chronic lung disease such as emphysema, bronchitis or asthma. The goal for rehab is to minimize the negative effects of lung disease through physical conditioning, education, respiratory therapy and controlled breathing techniques.

Norvant Health UVA Health System Culpeper Medical Center is a non-profit community hospital operating 24 hours a day and offering a full range of inpatient, outpatient, diagnostic, treatment, and emergency medical services.
