Carilion Giles Community Hospital Diabetes Management Program offers education, nutrition guidance, help in adopting a healthy and active lifestyle, how to control blood glucose through daily monitoring and exercise, and learn coping skills for day-to-day management of diabetes. Services include:

- Individualized care
- Group instruction
- Emphasis on primary care physician follow-up and communication
- Special programs for pediatric and obstetric patients
- Patient follow-up and case management
- Lifestyle management education, including instruction about diet and exercise
- Insulin pump education
- Nutritional therapy provided by registered dietitians

Diabetes Management Program is accredited by the American Diabetes Association.
