United States

Additional Availability Comments

Federal holidays are observed.

Dedicated to the vision rehabilitation of those who are visually impaired. We serve patients that are diagnosed with either a chronic eye disease or a congenital vision condition who are seeking vision rehabilitation beyond the use of conventional glasses and/or contact lenses

Low vision rehabilitation helps determine the best tools and techniques to meet your goals. This typically involves eye exams and the use of optical and non-optical visual aids or adaptations. It also includes education and counseling about resources such as state rehabilitation agencies, occupational therapy, support groups, and more.

Call for information about insurance for rehabilitation or aids.
