# **Considering OTC Hearing Aids? HLAA's OTC Tip**Sheet Can Help

### **Over-the-Counter (OTC) Hearing Aids**

OTC hearing aids are now available directly to consumers without a prescription or medical consultation. They are intended only for adults 18 and over with perceived mild-to-moderate hearing loss.

## **Considering OTC Hearing Aids?**

#### VIEW PRINTABLE HLAA OTC TIP SHEET

## What is "mild to moderate" hearing loss?

# You may have mild to moderate hearing loss if...

- You have trouble understanding conversations in groups, with background noise, or when you can't see who is talking.
- You have trouble hearing on the telephone.
- You need to turn up the volume of television or radio loud enough for others to complain.
- Your friends or family complain that you don't understand them.
- You frequently ask others to repeat themselves.

## OTC may NOT help you if...

- You also have trouble hearing conversations in quiet environments.
- It's difficult to hear loud sounds like power tools or motor vehicles.
- You have underlying medical concerns or conditions.

## If you experience these, you should see a hearing care professional.

### Important questions to ask about OTC hearing aids

- Is there a free trial period or money-back return policy?
- Does it need a smartphone, app or computer to install, operate and customize to my needs?
- Is it compatible with cell phones or smartphones?
- Does it have connectivity via Bluetooth, or <u>telecoil</u> to a smartphone, computer,or listening system?
- Can the hearing aid's amplification be adjusted?
- Is it water/sweat resistant?
- How does it control, reduce, or block out background or wind noise?
- How long is the battery life? Can it be recharged?

#### Other considerations

- Pay attention to package warnings. If you have pain, sudden hearing changes or dizziness, see a doctor.
- It may take time to adjust to hearing devices. If the first hearing aid doesn't work, keep trying. You may want to seek the help of a hearing care professional to advise you.
