Advance Care Planning (ACP) provides an opportunity to plan for future care and support, including medical treatment.

We're here to help. Please let us know if you have a question or feedback by emailing info@seniornavigator.org. Be sure to include your city, county, or zip code so we can better meet your needs.

Planning for Your Care

- The ACP process helps individuals understand and share their personal preferences and values regarding future care and treatment.
- ACP can improve health care communication, clarify care goals, prepare individuals for end of life, and decrease family caregiver burden.
- Most older adults have not engaged in ACP and even fewer have discussed ACP with their family physicians (NIH, 2018).

- Older adults and families can find the resources and information they need to connect with appropriate ACP supports and services.
